In their own words

"By Intended nationally determined contributions 2015 (INDC), the Government has set a long-term target for GHG emissions reduction until 2050, declaring the intention to achieve ecosystem climate neutrality. In 2021 the implementation period by the revised 2021-2030 NDC was fixed 2030 and mitigation target to 40% below 1990 levels was set at the same time ensuring that the 2015 long-term target set by the INDC is maintained. For the long term, the RA Government has set a target to reduce GHG emissions to 2.07 t CO₂ eq/capita by 2050."

LTS, 2024-02-19, p. 15
