In their own words

“An emissions reduction target of between 15% and 25% of baseline is envisaged (BUR2 2020). This provisional NDC 3.0 is presented with a conditional pledge to reduce GHG emissions by 2035 compared to the projection of a BAU scenario with the base year 2020 (BUR2 2020). The specific quantified target is under development and will be defined according to the available data, the sectoral contributions. As specified in 1(b), the emissions reduction target will be validated during the finalization of NDC 3.0. During this process, Mozambique will update this figure with a realistic, achievable and evidence-based target, based
